1. **Overview:**
The Pennsylvania Commission on Crime and Delinquency (PCCD) is now accepting applications for funding under the 2018 Gun Violence Reduction Initiative. The primary purpose of this initiative is to support the implementation of strategies that will result in reduced gun violence in local communities. Since 2014, Pennsylvania Uniform Crime Report (UCR) statistics have shown an increase in assaults by firearm. In 2016 alone, there were 5,103 assaults by firearm, which represented approximately 39.9 assaults by firearm per 100,000 Pennsylvanians.

In response to the increased concern for public safety and the rate of violence by firearms in Pennsylvania, the Governor’s Office has designated $1.5 million to support the 2018 Gun Violence Reduction Initiative. This is a competitive solicitation open to all municipalities (includes townships, boroughs, and cities) in the Commonwealth who demonstrate in their application collaboration with key stakeholders and a commitment to the implementation of evidence-based programming or promising practices that have been proven to be effective in reducing gun violence.

2. **Funding Availability:**
A total of approximately $1.5 Million in state funds is being announced to support this initiative. PCCD expects to fund five to seven grants. There are no matching fund requirements.

PCCD has established maximum award amounts based on the population of the locality as follows:

- Municipalities with population size of 500,000 or more are eligible to apply for up to $500,000;
- Municipalities with population size of 250,000 to 499,999 are eligible to apply for up to $250,000; and
- Municipalities with population of up to 249,999 are eligible to apply for up to $150,000.

Award Letters will be mailed as soon as possible after the applications are approved and will also be available in Egrants.

PCCD is not liable for costs incurred prior to the official start date of the award.

3. **Non-supplantation:**
Funding must not be used to supplant/replace state, federal or local funds that would otherwise be available to provide for program-related services. PCCD funding is to be used in addition to other funds that are made available for services.

4. **Project Dates:**
Contingent upon availability of funds, successful applications will be 12-month projects and have a start date of July 1, 2018 and an end date of June 30, 2019.
5. Eligible Applicants:
All municipalities in Pennsylvania are eligible to apply under this funding solicitation. Under this solicitation, municipalities include townships, boroughs, and cities.

6. Program Goals, Objectives and Anticipated Impact:
   a. The goal of the Gun Violence Reduction initiative is to provide municipalities in Pennsylvania with resources to develop a program structure to reduce gun violence that includes participation by a variety of public and community organizations, including but not limited to prosecutors, courts, probation and parole, schools, health services, community organizations, local businesses, and the media.
   b. The primary objective of this initiative is to implement strategies resulting in the reduction of gun violence in communities. Gun Violence Reduction funds will support the implementation of evidence-based or promising practices aimed to reduce gun violence.
   c. Anticipated Impact: Increased collaboration among law enforcement and community members; reduction in the number of assaults by firearms; reduction in the number of robberies by firearms; and reduction in the number of homicides by firearms in the targeted communities.

7. Eligible Program Activities and Expenses:
Funds may be used to develop a plan or implement a program aimed to reduce gun violence based on the needs and gun violence problems in the targeted community. The application must include baseline data that identifies specific high-risk target populations and should include effective strategies with measurable goals and outcomes. Funds will also support the implementation of evidence-based strategies and programs that include, but are not limited to:
   a. Implementation of Operation Ceasefire;
   b. Implementation of Cure Violence Health Model;
   c. Implementation of Positive Action; and
   d. Other strategies that result in the reduction of gun violence and increased safety in communities.

Operation Ceasefire – Originally developed in Chicago, Ceasefire is a violence intervention based on the premise that violence is a public health issue and can be prevented. Ceasefire’s approach includes efforts to heighten community awareness about gun violence and encourage area residents, community, business and faith-based leaders to work together and get involved. Ceasefire uses the five core components:
- Community mobilization
- Youth outreach
- Public education
- Leadership involvement
- Criminal justice participation

Cure Violence Health Model (http://cureviolence.org/). The Cure Violence Health Model uses epidemic control method to reduce violence. Like all potentially harmful
behaviors – drug addiction, smoking, eating too much, exercising too little, risky sexual behavior and other behaviors – violent behavior can be understood, diagnosed, and treated through a health lens.

The program trains carefully selected members of the community — trusted insiders — to anticipate where violence may occur and intervene before it erupts. These trained violence interrupters and outreach workers prevent shootings by identifying and mediating potentially lethal conflicts in the community, and following up to ensure that the conflict does not reignite.

*Positive Action* ([www.positiveaction.net](http://www.positiveaction.net)). A universal, evidence-based prevention program, Positive Action is a school-based program that focuses on school-wide climate change for grades K-6 and grades 7-8. The program content is divided into six units. The first unit underlines the program philosophy and provides an introduction to the potential impacts of positive and negative actions/behaviors. The remaining units educate students on positive actions and behaviors for the physical, intellectual, social and emotional areas. Outcomes include a reduction in violence, bullying, and disruptive behaviors.

*Other Strategies* that are deemed to show evidence of reducing gun violence. Examples of potential programs for consideration may be found on [https://crimesolutions.gov](https://crimesolutions.gov).

8. **Required Grants Sections/Documents:**

APPENDIX A – What is “evidence-based”

What do we mean when we say a program is “evidence-based”?

Programs can be placed along a **continuum of confidence** based on their evidence or theory.

---

**How to identify where a program is on the continuum:**

Read the research studies on the programs you are considering to determine the following:

1) Was effectiveness demonstrated in rigorous scientific evaluations?
   - Look for at least one randomized control trial.

2) Was effectiveness demonstrated in large studies with diverse populations or through multiple replications?
   - Look for two or more studies, studies that show impact with diverse populations, and studies done by independent researchers (aka not the developer of the model).

3) Did the study show significant and sustained effects?
   - Look for follow-up data showing that impacts were sustained at a minimum of 6 months post program.

If the answer is yes to all three of these questions then most likely the program you are reviewing falls in the green, evidence-based end of the continuum.
Another way to identify where a program falls on the continuum is to utilize a clearinghouse that has already done the review of the research and rated the program’s evidence of effectiveness.
