1. Reentry Strategic Plan Components

a) Can you please explain in more detail what you are referring to in the two specific items below from Page 4 of the solicitation?

“Reentry strategic plans must be data-driven and should include an assessment of offender policies/practices upon arrest; identify risk and needs assessment tool outcomes, if used;...”

- By “offender policies/practices upon arrest” are you looking for police department policies/practices, bail and other court policies/practices, or diversion programs?
- And by “identifying risk and needs assessment tool outcomes” are you looking for a compilation of the information obtained through the assessment of individuals in a time period?

**Answer:** The Reentry Strategic Plan should include a broad assessment of offender policies and practices upon arrest from across the county based on available information. This may include but is not limited to the evaluation of policies, practices, and procedures for local police departments, booking, bail, courts, diversion programs, etc. The Reentry Strategic Plan should also identify trends in outcomes for any risk and needs assessment tools administered within the county. Applicants are encouraged to look at historical trends, if the information is available, but a specific time period is not required.
