**Description of Service:** This should include a brief overview of the service within the context of the program, the location and if community based or residential. Indicate the type of youth referred, how the service is delivered, the purpose of service and any other relevant information to help the reader understand the SPEP service type classification. (350 character limit)

The Glen Mills Schools, is a residential facility for males, ages 12-18 (at admission) with an IQ of 70 or above. Founded in 1826, it was originally incorporated as the Philadelphia House of Refuge. In 1892, the school relocated to its current campus in Delaware County, Pennsylvania, on nearly eight hundred acres, and in 1911 changed its name to the Glen Mills Schools. Programming identifies and addresses criminogenic risk factors using 7 research and evidence-based, group and individual interventions, practices and programs within the framework of a positive normative environment. Programming includes but is not limited to the following: identification of individual risk factors, diagnostic assessment, guided group interaction, cognitive behavioral therapy, individual and group counseling, school wide positive behavior supports, gun violence reduction, anger management, parenting skills, development of individual strengths, adolescent substance programming, recreational programs, social and life skill development, independent living skills, regular and special education, health, physical education and recreation, interscholastic sports participation, career and technical education, community service and restitution opportunities, cultural awareness, health services, dental services, restorative justice practices, resiliency through the Bulls Club membership, spiritual services and transitional planning, etc. An Individual Service Plan is developed for each youth within 30 days of arrival. Progress is reviewed and documented on a monthly basis. Individual Plans are reviewed and revised a minimum of every six months during placement.

Developed by Dr. Gilbert Botvin, Life Skills Training is a service intended to teach prevention related information, promote anti-drug norms, teach drug refusal skills and foster the development of personal self-management skills and general social skills. When delivered correctly, Botvin Life Skills has been proven to reduce tobacco, alcohol and illicit drug use by as much as 80%. It is primarily used by school districts in secondary grades. Three primary components of Botvin Life Skills are Personal Self-Management Skills, General Social Skills and Drug Resistance Skills. It is a closed 10-week group consisting of 7 lessons in the high school version and 18 weeks in the middle school version. It is delivered on campus on Thursdays. Glen Mills youth ages 12-15, receive the middle school version. There is role playing and modeling of behavior that is peer driven.

The four characteristics of a service found to be the most strongly related to reducing recidivism:

1. **SPEPT™ Service Type:** Social Skills Training

   Based on the meta-analysis, is there a qualifying supplemental service? No

   If so, what is the Service type? There is no qualifying supplemental service

   Was the supplemental service provided? n/a

   Total Points Possible for this Service Type: 20

   Total Points Earned: 20

   Total Points Possible: 35

2. **Quality of Service:** Research has shown that programs that deliver service with high quality are more likely to have a positive impact on recidivism reduction. Monitoring of quality is defined by existence of written protocol, staff training and supervision, and how drift from service delivery is addressed.

   Total Points Earned: 10

   Total Points Possible: 20
3. **Amount of Service:** Score was derived from examination of weeks and hours each youth in the cohort received the service. The amount of service is measured by the target amounts of service for the SPEP service categorization. Each SPEP service type has varying amounts of duration and dosage. Youth should receive the targeted amounts to have the greatest impact on recidivism reduction.

| Points received for Duration or Number of Weeks: | 0 |
| Points received for Dosage or Number of Hours: | 0 |

Total Points Earned: ____0____ Total Points Possible: 20

4. **Youth Risk Level:** The risk level score is compiled by calculating the total % of youth that score above low risk, and the total % of youth who score above moderate risk to reoffend based on the results of the YLS.

| youth in the cohort are Moderate, High or Very High YLS Risk Level for a total of | 10 | points |
| youth in the cohort are High or Very High YLS Risk Level for a total of | 5 | points |

Total Points Earned: ____15____ Total Points Possible: 25

**Basic SPEP™ Score:** ____45____ total points awarded out of 100 points. Compares service to any other type of SPEP therapeutic service. *(eg: individual counseling compared to cognitive behavioral therapy, social skills training, mentoring, etc.)*

**Note:** Services with scores greater than or equal to 50 show the service is having a positive impact on recidivism reduction.

**Program Optimization Percentage:** ____53%____ This percentage compares the service to the same service types found in the research. *(eg: individual counseling compared to all other individual counseling services included in the research)*

**The SPEP and Performance Improvement**

The intended use of the SPEP is to optimize the effectiveness of reducing recidivism among juvenile offenders. Recommendations for performance improvement are included in the service feedback report, and these recommendations are the focus of the performance improvement plan, a shared responsibility of the service provider and the local juvenile court. The recommendations for this service included in the feedback report are:

The Botvin's Life Skills Training service at Glen Mills Schools scored a 45 for the Basic Score and a 53% Program Optimization Percentage. It is classified as a Group 3 service - Social Skills Training. The program could improve its capacity for recidivism reduction through the following recommendations:

1. Hold regularly scheduled booster trainings for staff delivering the evidence based services including Botvin.
2. Develop a more systematic approach to staff observation and supervision and document the staff observations and feedback. Provide delivery staff with written feedback at predetermined time frames whether the feedback is positive or negative.
3. Explore ways to enhance curriculum to achieve the recommended amount of service of 16 weeks and 24 hours.
4. Collect outcome data on youth in Botvin Life Skills, elicit feedback from youth and staff on the service and use that information to enhance the way the service is delivered.
